
I am going to be talking about how to download a specific font onto a windows device. This is a small tutorial on how to do this without the need for third party software.

Steps: 1. Open up the internet browser on your phone, tablet, or computer and search "shruti gujarati font free download". 2. Click on the first link that's viewable and it will take you to google drive where there will be several files of different sizes in different formats - click "shruti gujarati font" then select "shruti-gujarati-mono-bold" then click download button in top right corner of screen next to "+New Folder". 3. Once the download has finished click "shruti gujarati font" next to "+New Folder", then click "shruti-gujarati-bold-mono" then click the download button in the top right corner of the next page. 4. Once this is finished click "shruti-gujarati-regular" in the file list in the right side of the page. 5. Once again, download the font by clicking "shruti-gujarati-regular" in the middle of said list. 6. Once this one finishes downloading click on the name of the font that has just finished downloading to open up your device's file browser and navigate to where you downloaded all 6 fonts into 6 folders (The way you look at it will determine what font goes where). 7. Once you are in the correct folder, click on all of the fonts one by one and they will open for you to use them - Click yes to install each one. 8. That's it! You now have your desired font installed to your device!
